Copyright Agreement and
Academic Integrity Acknowledgement
CSCI 577a: Software Engineering I - Fall 2010

Name of Student: __________________________________________________
(please print)

Student ID: __________________________________________________

COPYRIGHT AGREEMENT:

The non-proprietary* software, including reports and documentation, you are developing in USC
Computer Science courses 577a&amp;b, 510, and 590 involves the use of software tools and components
copyrighted by the USC Center for Software Engineering. The intent of the Center's copyright is not to
prohibit people from developing commercial products based on the tools and components developed in
these courses, but to ensure that all interested parties have an equal opportunity to do so and that USC's
rights are not constrained.

The Center also applies the above approach to copyright, in the name of USC, all non-proprietary
software, reports and documentation which developed in the CSCI 577a&amp;b, 510 and 590 courses. Please
sign this agreement below to acknowledge that you are aware of this condition and agree to it. We will
provide a copy of this signed agreement for your records.

This Agreement is governed by the laws of the State of California.

Sincerely,

Prof. Barry Boehm, Director Emeritus, USC-CSSE
A. Winsor Brown, Asst. Director, USC-CSSE

I HAVE READ THE ABOVE AGREEMENT AND HEREBY AGREE TO ITS TERMS AND CONDITIONS:

Signature: ___________________________ Date: ______________________

ACADEMIC INTEGRITY ACKNOWLEDGMENT:

I have read the academic integrity policy published at:
http://greenbay.usc.edu/csci577/fall2010/site/academicpolicy.htm, and all the related materials linked from
that page. I acknowledge the importance of USC’s academic integrity standards (with respect to
plagiarism, referencing others’ work, etc.), and agree to abide by them:

* Proprietary software includes software you develop for your employer, which while it may be the
subject of process data gathering, remains the property of your employer. Non-proprietary software
includes assignments and artifacts generated to specifications provided by the course and web sites
generated in response to course assignments.
