1. Introduction

1.1 System Overview

The system is an online tool that bridges peoples’ healthy goals to motivation through the use of community and charity by recognizing that each one contributes a unique piece to the success of the other. To do so, the system allows the people, who are willing to lose weight, to invite their friends or family members to sponsor them by donating money to charity organizations. The money goes to the charity organizations for every lost pound. Hence, the name came from “Lose4Good”; meaning that the weight losers are losing weight for a good cause.

1.2 System Requirements

There are no special Hardware or Software requirements for the project to run. Only a Web Browser can access the system by calling the link of the Hosting Server where the System Web Application and the Database reside on.

1.2.1 Hardware Requirements
