VERSION HISTORY	II
TABLE OF CONTENTS.....	III
1. Introduction.....	4
2. Tests to run.....	4
3. Regression Test Results	4

1. Introduction

This Regression Test Package shows the test cases needed for this project in order to verify our system functions as the client expects. Focus shifted from unit testing to quality testing, making sure core aspects functioned as expected. Tested the quality of both aspects of our project: The Web Application and the SMS Notifications.

2. Tests to run

We may have the following cases that system will change in the future.

TC-12-01, TC-12-02, TC-09-03 are the cases that may change in the future. Currently not deleting profiles, only disabling. Currently don't send notifications from changes made on the web application, when farm owner/contractor update location.

3. Regression Test Results

Almost all of the test cases pass. Three were discarded as described above. Two failed, both for the same reason. The user is unable to search for quizzes in the educational content.

Test Case Number	Testers	Result
